- Clinically proven to relieve joint discomfort and manage cartilage degradation

UP: \$69⁹⁰

\$59⁹⁰ FLEXISEQ
Gel
(Value Pack)
50g x 2s

Understanding Osteoarthritis

A degenerative condition that affects any joint in the body caused by wear and tear of cartilage which cushion the ends of bones in joints. Commonly affects large weight-bearing joints such as hands, knees, hips and spine.

SYMPTOMS:

- Joint discomfort
- Difficulty in movement
- Bony lumps around joint

MANAGING THE DISCOMFORT

- Ibuprofen or naproxen may ease pain with inflammation.
- Topical options include pain-relieving cream/gel or hot and cold packs.
- Take supplements with glucosamine, chondroitin, MSM, and type II collagen.

REDUCING THE RISK

- Maintain a healthy weight through a balanced diet
- Exercises such as swimming also strengthen muscles around the joints
- Give the joints sufficient rest when you have injuries
