Dealing With Common Infant Problems

COLIC

- Intense crying that may last up to several hours at a time.
- Baby may clench their fists, tense the abdominal muscles, and curl the legs up.
- May occur between a few weeks after birth and ends by the third month.

How To Comfort:

1. Giving small frequent feeds and burping the baby well.
2. Taking baby on car rides.
3. Giving colic medication as a trial for a few days.

CRADLE CAP

- Pale yellow scale or crust at the back or on the top of the baby's head.
- May spread to the eyebrows and behind the ears.
- Begins soon after birth and clears by 6 to 12 months of age.

How To Comfort:

1. Regularly massage baby oil in the crusts before bath time.
2. Use a mild shampoo to wash the crusts out.
3. Do not force the crusts out as it may cause bleeding.
